

# Delaware River

*scroll through to see why our waterways are so important and how to protect them*

The Delaware River was voted River of the Year!

*by AmericanRivers.org*

# *Why should we care about the Delaware River?*

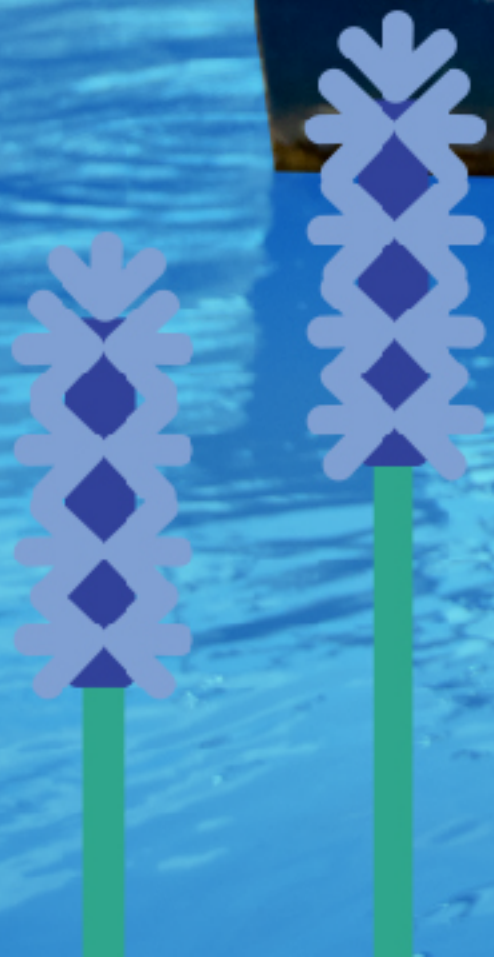

***It provides drinking water  
to 15 million people!***

*We also depend on this water for cleaning, bathing, laundry- any time you turn on your tap you are using water from the Delaware River.*

*River Ambassadors work hard throughout the summer to advocate for the river's health and provide daily water testing to showcase how well our river is doing!*

*What can you do to protect our waterways?  
Watch your water consumption! Reduce,  
reuse, recycle! Clean up our streets!  
There are several things we can do as a  
community to protect our waterways.*
